Did you know?

Online Hook-Up Apps can pose significant concerns related to the **spread of STIs**.

You may not know if you've been exposed.

- **BE SEX SMART:** You usually can't "tell by looking" if someone is infected with an STI. Symptoms may not be present.
- **USE PROTECTION:** Unprotected oral, anal, and vaginal sex help spread STIs.
- **GET TESTED:** STIs can cause infertility and other long-term health problems if not diagnosed and treated early.

HIV/STI testing

- **Cornell Health:** FREE on-campus STI/HIV testing for students. Pharmacy offers range of safer sex products.
- **Planned Parenthood** (620 West Seneca) 607-273-1513
- **Off-campus health care providers**

STIs are on the rise on our campus and in the county.

- Get **TESTED**
- Be **SAFE**
