... then you must meet Cornell’s TB screening requirement:

Following public health and college health guidelines, Cornell requires full-time students from countries that have a “high incidence” of tuberculosis to provide documentation of results from a recent TB screening.

- **TESTS:** Only a Quantiferon-TB Gold or T-SPOT blood test will be accepted. Skin tests do not meet this requirement. If your TB blood test result is positive, you also must submit a chest x-ray report (no films).

- **DATES:** Summer or fall 2020 entrants: your test must be dated September 1, 2019 or later. Spring 2021 entrants: your test must be dated February 1, 2020 or later.

- **DOCUMENTATION:** Enter information using the “TB Screening” form in your Medical Clearances list in myCornellHealth.

If you are not able to obtain required TB screening or documentation, you must arrange for TB screening as soon as you arrive at Cornell. See website instructions for details.
