

CORNELL'S TUBERCULIN (TB) SCREENING REQUIREMENT

Cornell University has the responsibility to protect its population from many contagious infections. Active TB disease does appear in this population on a regular basis. One case of active disease can infect dozens of people in this close-knit community. Therefore, tuberculin screening **at Cornell Health** is:

- required** for students from countries where TB is prevalent. Screening **must be performed at Cornell Health** within three weeks of arrival at Cornell.
- recommended** for all students, especially those who have ever lived or spent time in a country where TB is prevalent.

GROUP A countries have been determined by the World Health Organization to have a "low incidence" of TB. Students from these countries **are NOT required** to have a screening test for TB. However, TB screening **is recommended** for all students, especially those who have ever lived or spent time in a country where TB is prevalent.
